# Zomato's API: What's on the Menu in Denver?

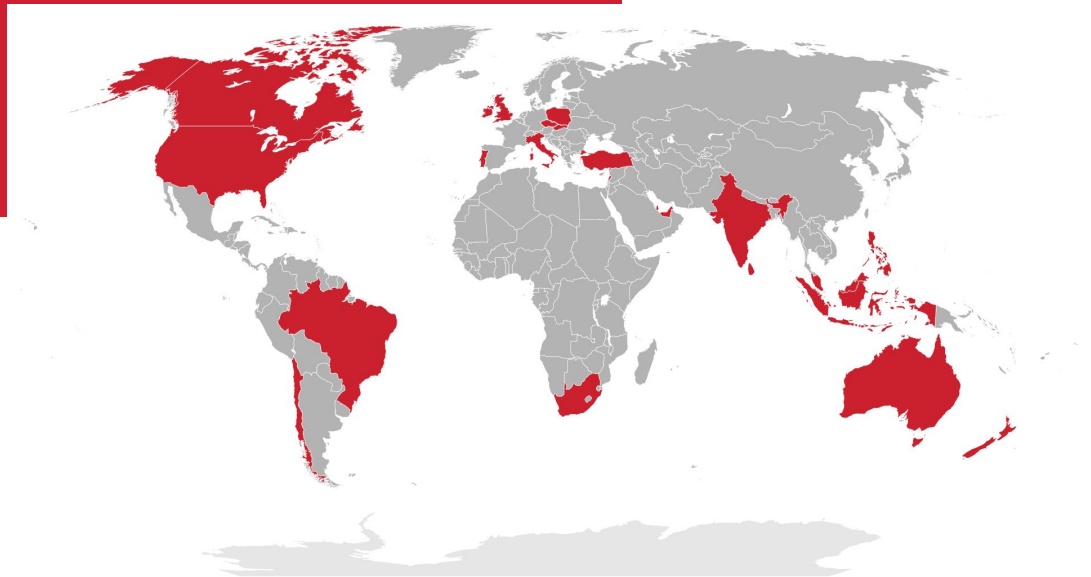

Chad Anderson, Damian McDonald, Laura Talkington, Jack Heston

UNIVERSITY *of*  
DENVER

zomato

- Core Message:
  - *Identify the top restaurants in Denver through Zomato ratings by users*
  - *Identify the top restaurants in Denver through Zomato through 5 different cuisine types*
  - *Determine the locations of the top rated restaurants in Denver*
    - *Scatterplot & heatmaps*
- *What kind of restaurants were the most popular around Denver?*
- *Where are these restaurants mainly located?*
- *What is the distribution of the top 100?*
- *Zomato API was used based on the general search API which used latitude and longitude, then cuisine ID which was identified by the group*

- *API key limited to 100 results*
- *API key limited to 100 requests per day*
- *API seems restrictive in general and convoluted*
- *Multiple API's needed to get our identified data*
- *API keys were difficult to determine how to get the data we wanted*
- *Parsing down cuisine types as there were multiple descriptors for each restaurant*
- *Moved the full 500 into a CSV for simplified parsing*
  
- *Trial and error mostly*
- *Parsing down to create multiple columns of cuisine types*
- *Determining which API's were the correct ones to find our data*
  
- *Most of the top restaurants are located around downtown Denver*
  - *Highest density around LoDo, Cherry Creek, Highlands, Cap Hill, Baker,*
  - *Smaller pockets in Lakewood, Edgewater, Boulder, Englewood, University of Denver*
